Pervasive Play for Everyone Using the Weather

Weather Wizards

A game where the wizard's powers are affected by real weather.
Player chooses a fight location in a globe map.
Player's strength in combat varies according to the real weather conditions in that location.

Weather Module

Retrieves and processes the weather data and provides it to the games that need it.

Other games...

The Weather Module can be reused in other games.

Real Farming

Crops growth is affected by the real weather in a location chosen by the player.
